EXPERIENCE

Front-End Developer
Oanda - Coinpass LTD

📅 Oct 2023 – Ongoing   📍 London, UK

Coinpass is a UK-based cryptocurrency exchange platform.

– Built, designed, and styled the Affiliates Admin portal from scratch using NextJS 14 and TypeScript, featuring comprehensive forms with validations (Yup, Formik) and AWS Amplify login.
– Designed and implemented new control/admin panel features, improving usability and functionality.
– Implemented security measures to enhance website security.
– Played a key role in rebranding Coinpass.com to OANDA Crypto, ensuring a smooth transition and consistent user experience.
– Techs: Nextjs, React, JavaScript, TypeScript, GraphQL, TailwandCSS

Front-End Developer
RetreatParner

📅 Jul 2023 – Ongoing (Part-Time)   📍 Germany

A Startup developing a platform for managing retreat bookings and related services.

– Led front-end team, refactoring 75% of the codebase, boosting performance through code splitting, and removing redundant UI libraries.
– Engineered a comprehensive global search feature with advanced filtering options similar to Airbnb.
– Instrumental in UI development, implementing reusable code and components, and driving website optimization efforts to ensure seamless user experiences.
– Developed reusable code and components, maintaining readability and quick bug fixes.
– Techs: Nextjs, TypeScript, GraphQL, Apollo client, TailwandCSS.

Full Stack Developer
Cult Of Coders

📅 Aug 2022 – Oct 2023   📍 Iasi, Romania

– Enhanced the project management capabilities of the AgencyBox Dashboard by implementing new features specifically designed for small businesses.
– Assumed full ownership and successfully implemented the AgencyBox landing page.
– Developed new features for The Super Club website and admin dashboard to streamline event management processes.
– Techs: React, Next.Js, GraphQL, Apollo client, Antd.

Full Stack Developer
Callvita Company

📅 Sep 2021 – Aug 2022   📍 Cairo, Egypt

A comprehensive Global marketplace for offering services online worldwide.

– Developed new features, maintained the Srvy app, and translated 40+ wireframes into prototypes.
– Implemented real-time call booking through AppSync and GraphQL integration.
– Translated 40+ wireframes into prototypes, fostering results-driven culture.
– Conducted code reviews, mentored junior developers, and led pair programming sessions.
– Techs: React, React Native, GraphQL, NodeJS, Express, PostgreSQL.

EDUCATION

B.Sc. in Electronics and Communication Engineering

Alexandria University, Egypt

📅 Oct 2014 – Jun 2019

(EU Blue Card-Eligible University)

STRENGTHS

Front-End
